

Directions to display and removal of the message to canceling the GSM lecture because of inclement weather.
Step one logon to GSM web site.

The image is a screenshot of a web browser displaying the Geological Society of Minnesota website. The browser's address bar shows the URL gsmn.geosocmn.org. The website features a header with the GSM logo on the left and a geological cross-section titled "ROCK TYPES" on the right. The cross-section shows various rock layers with labels: "sandstone and shale", "iron-formation", "glacial and stream sediments", "graywacke and slate", "sandstone, dolost one, and shale", "volcanic and sedimentary rocks", "metamorphic and plutonic rocks", and "fault". Below the header is a navigation menu with items: Home, Events, Members, Links, Outreach, About GSM, and Contact. The "About GSM" menu is open, showing sub-items: History, Organization Information, Mission, and Administrator Login. A red arrow points to the "Administrator Login" link, which is highlighted in a blue box. Below the navigation menu, the main content area begins with a "Welcome to the Geological Society of Minnesota" heading and a paragraph of text. Further down, there is a section titled "GSM Seminars" with a paragraph of text.

Welcome to the Geological Society of Minnesota

The **Geological Society of Minnesota** is a nonprofit educational organization whose mission has been to promote public interest and to supply educational support in the field of geology. We are based at the University of Minnesota, conduct statewide and regional field trips, maintain a media library, publish relevant information for public distribution, and maintain and expand upon a series of geological markers throughout the state.

GSM Seminars

GSM's seminars with PowerPoint presentations are free and open to the public. They are presented by leading professionals in their fields and are aimed at learners from high school to adult. A question-and-answer sessions follows each seminar. The labs, also free and open to the public, allow a hands-on learning experience and demonstrate the ideas and principles of geology and earth science.
